Hiring Manager

Dear Hiring Manager,

My name is Andrea Fossà and I am a Master's student in Artificial Intelligence at the University of Bologna, with a Bachelor's degree in Bioinformatics. I am applying for this PhD program as I believe it is the perfect position that reflects my ambitions and what I love. During my academic and research career, I have gained experience in the field of Deep Learning applied to biomedical signals, with a focus on classification and optimisation of integral pipelines. I am familiar with the use of tools such as Docker, Git and actively develop mainly in Python and PyTorch. I am currently doing an internship at the Bruno Kessler Foundation where I am working on a project that applies (tiny) Deep Learning techniques in the Brain-Computer Interface (BCI) domain. Here, in addition to improving my knowledge on the subject, I am learning to develop software in a professional manner by applying concepts studied in software engineering. I am highly motivated to contribute to innovative projects in the field of Artificial Intelligence applied to healthcare, which represents my long-term aspiration. Thank you very much for your attention. I remain available for any further information.

Sincerely,  
Andrea
